PARADOX PARADOX

PARADOX fuses the precision of modern manufacturing with the beauty of traditional craftsmanship, creating crystal glasses that stand out for their unparalleled quality and style. Our mission is to offer high-end products that meet the expectations of functionality and aesthetics, adding a touch of distinction to every occasion.

We have two main lines of glasses that reflect both our commitment to excellence and exclusivity: Moulded glasses and hand-blown glasses.

FORMA GLASSES:

This line represents the efficiency and consistency of series production. Our moulded cups are manufactured with advanced technology, ensuring uniformity of size, shape and finish. Each glasses undergoes a rigorous quality control process, ensuring compliance with the highest standards.

HANDMADE GLASSES:

For those who value exclusivity and traditional art, our handmade glasses are the perfect choice. Each one is created by hand by skilled artisans, using age-old glass blowing and shaping techniques. This handmade process gives each glass unique characteristics, with subtle variations in shape and design, making each piece a unique work of art.

WE HAVE MORE THAN

25 YEARS

OF EXPERIENCE IN THIS SECTOR.

PLANS AND DESIGNS:

In addition to offering handmade glass, at PARADOX we make our own plans for our designs, taking care of every detail and quantity of glass used.

Technical specifications: Exact dimensions, volumes and design details.

Material: Cristalin.

Manufacturing process: Description of the artisanal process involved in the creation of each glass, from blowing to finishing.

Customisation: Possibility to personalise designs according to the client's preferences, whether in terms of shape, colour or additional details.

These plans are an invaluable tool for making unique and exclusive glasses. Each blueprint is a faithful representation of the art and dedication we put into each and every one of our handmade pieces.

THE PERFECT CRISTALIN:

The perfect crystal glass is light but strong. The rim is thin, but firm. It has an attractive shine, but is made of a material so pure and transparent that it seems almost invisible. The shape is elegant and brings out the nuances of the wine, but will never steal the limelight from the Tasting experience.

Light but strong.
Thin but strong.
Attractive but invisible.
It stands out, but never steals the limelight.

The perfect crystal glass is full of contradictions,
but it is not impossible.

And this is what we achieve at PARADOX.

PURE CRYSTALIN:

Only the finest and most impeccable raw material is suitable to achieve the brilliance and transparency of the most prestigious wine glasses.

BALANCED DESIGN:

The constant search for perfection is the only way to achieve excellence in a product. It is necessary to take into account important aspects and characteristics of the shape and quality of the glass to achieve the perfect harmony between elegance and performance.

MINIMUM THICKNESS:

Meticulous engineering is necessary to meet the demands of professionals. The right balance between lightness and strength is self-explanatory.

LASER CUT:

The true expert knows that the execution of the rim of the wine glass must be cold cut to ensure the best harmony and Tasting experience.

EXPERIENCE AND DETERMINATION

A company capable of synthesising all the knowledge of the glass industry of the last 50 years and combining it with the audacity and talent of the new generations.

Our standard is perfection, and we strive to achieve it at every stage of the production process, thus ambitiously pursuing a single goal: the perfect glass.

EXCLUSIVITY:

We understand that every customer is unique and are proud to offer customisation options for our mugs. Whether through exclusive designs or tailoring our products to specific needs, we strive to create pieces that reflect the individuality of our customers.

Whether through exclusive designs or by tailoring our products to specific needs, we strive to create pieces that reflect the individuality of our customers.

DETAILS:

At Artesanía en Vidrio we believe that details make the difference. Every curve, every texture and every finish is carefully considered to ensure that our glasses are not only functional, but also visually stunning. This attention to detail is what makes each glass a work of art.

COMMITMENT:

Customer satisfaction is our top priority. We listen carefully to your needs and expectations and strive to exceed them with every product we supply.

Handmade

HIGH QUALITY COLLECTION PIECES

Handmade

HANDMADE GLASSWARE

Hand-blown cristalin glasses are unique and elegant pieces, created through an artisanal process that requires skill and precision. This type of glassware, often made by expert glassmakers, has a long tradition in different cultures.

AESTHETICS AND LUXURY

Transparency and brilliance create an elegant and refined ambience.

DURABILITY

Although delicate, handmade glasses can be very durable if properly cared for, as hand-blown glass is less prone to defects than mass-produced glass.

TRANSPARENCY AND PURITY

Glass has a high visual quality, which allows light to pass through it brilliantly. The clarity of crystal clear glass is ideal for bringing out the colours of liquids and providing a flawless visual experience when serving beverages.

ARTISTIC VALUE

Each glass is a work of art created by a skilled craftsman, giving it an added value that goes beyond the functional.
